Surgical & Pre-operative Management of Peri-implantitis. Differential Indication of Hard and Soft Tissue Transplantation Techniques.

Early bird rates extended to 15th July 2016!

Dental implantology has been a success and its application has often contributed to significant improvement in quality of life. However, the future success of dental implantology can only continue if clinicians and basic scientists actively address the problem of peri-implant infections. Reports of implant-related infections are now commonplace. Before these reverse the gains in quality of life, orchestrated efforts are required, starting from the biological response of the soft and hard tissue, to promote the complex understanding of the peri-implant pathological processes.

The aims of the [lecture](#) are:

- To demonstrate the complexity of peri-implant problems and complications.
- To promote understanding of the underlying mechanics and biology.
- To derive indications and clinical implant practices that can give the best prognosis for long term sustainability.

Accelerate your success in 3D

Cone Beam Dental Imaging is a rapidly expanding technology in the region and is revolutionizing the way dental patients are imaged. In the past years, digitalization of x-rays found more and more entrance in numerous practices, supplemented by the revolutionary 3D volumetric tomography. This established technique is irreplaceable and extremely useful for DMFR diagnostics and also for implant planning. There is not only the question regarding the clinical indication, where CBCT could be useful, there is also the question how to integrate this technology into the daily workflow in your practice to your maximum benefit.

Topics include:

- CBCT workflow
- Clinical indication of CBCT imaging
- Periodontology
- Clinical advantages

[Learn more about how 3D imaging and related software features assist you](#)

[through a Clinical approach](#). Go Beyond with 3D.

Venue: Concorde Hotel – STUDIO 1

Date: 17 August 2016

Download the brochure at: go.kavo.com/sg/3dimaging and join us. You will get 5 CDE points for full attendance.
