Risk of diabetic ketoacidosis associated with sodium-glucose cotransporter-2 inhibitors

HSA would like to alert healthcare professionals that sodium-glucose cotransporter-2 (SGLT2) inhibitors have been associated with the potential risk of developing diabetic ketoacidosis (DKA), some of which are euglycaemic DKA. HSA has assessed the benefit-risk profile of SGLT2 inhibitors and found that while it remains favourable for their approved indications, the possibility of SGLT2 inhibitors use leading to an increased risk of DKA cannot be excluded, particularly in the presence of predisposing factors. Healthcare professionals are advised to use SGLT2 inhibitors according to the licensed indications and be cautious with their use in patients with predisposing factors to DKA. Patients on SGLT2 inhibitors who present with metabolic acidosis should be assessed for ketoacidosis and tested for blood ketones, even when their blood glucose levels are not high.

Tzu Chi Foundation Humanitarian Medical/Dental Mission Trip to Sri Lanka. May 20th to 23rd, 2016

Ever since the Asian Tsunami Crisis, Singapore TzuChi Foundation has been organising medical / dental missions to SriLanka. The needs are plentiful, but the supplies are few and far in between.

Dental and medical volunteers are welcome to join us for this humanitarian trip to benefit the underprivileged. We will be providing the services at a local District Hospital about 2 hours away from the capital Colombo.

Dental services will include extractions, surgical removal of teeth, as well as simple fillings (both using ART technique as well as normal drill excavations using modern 4th generation field dental chairs). Temporary registration with the local health authorities is a requirement to enable us to practise there.

Accommodation will be in local hotels and all-inclusive total costs for the trip will

be about SGD\$1,000 to cover airfare, hotel and accommodation.

As vacancies are allocated on a first-come-first-serve basis, kindly reply ASAP to avoid missing out a good opportunity to do good for others.

For further information and registration, kindly contact one of the following :

1. Ms Jennifer Ee, jenniferee@gmail.com
2. Dr. Eugene Tang KW, eugenetangkw@gmail.com
3. Ms Lisa Chong, lisachong0104@gmail.com

Thank you very much.

Note: This information is sent on behalf of Structo Pte Ltd. For any enquiry, please refer to the contact details as indicated.

Singapore-based Structo Launches OrthoForm – 3D printer for the dental industry

Structo is a Singapore-based manufacturer of 3D printers. The OrthoForm was developed as an innovative 3d printing system to print molds for aligners, splints, indirect bonding trays, surgical guides and more. The OrthoForm printer is easy to use, office friendly, and able to output more objects at a faster rate

than competing 3d printers.

To see the printer in action, you can visit this link:

<https://www.youtube.com/watch?v=c8uusNU5K6I>

Structo will be holding a seminar on how to use the OrthoForm to insource clear aligner manufacturing. For those interested, please pre-register here:

<http://goo.gl/forms/M8xbd97dib>

For further information, please email: dhruv@structo3d.com or call 63030692.
