Wisdom Tooth Management Course

Though impacted wisdom teeth removal is one of the most common surgeries among dentists, it remains to be one of the most challenging operations. This course aims to help the clinician to identify the challenges that may be encountered and to manage common complications. The core of the course is a structured step-by-step wisdom tooth surgical guide designed to assist the dentist in navigating an uneventful operation and inculcating a deeper understanding of the fundamental basics of surgery.

Participants are encouraged to bring in their own patient. They will have the opportunity to perform a guided wisdom teeth live surgery together with an Oral Surgeon.

Goldplus Universal and **Le Mints Oral Surgery** has arranged a 2 days course on **18th & 19th May 2017** at Le Mint's Seminar Room, 160 East Coast Road, Singapore 428867. Tuition is **\$600** (without patient). **\$0** (with 1 own patient for live surgery for 1-2 wisdom tooth).

CDE: 16 points! All participants will received a FREE implant voucher worth \$385.00.

Limited seats! To register, Contact: Francis at 9117 9696. Email:
francis@goldplusuniversal.com.sg

Bio-Esthetics and Function in Harmony

Exploring the advanced knowledge in the field of esthetic treatments, including esthetic diagnostic, treatment planning based on bio-mechanical principles, bleaching and direct composite technique with pre-fabricated veneers and occlusions.

It is an artistic and technical challenge for many users to produce high-quality direct composite veneers using the freehand layering technique. Using pre-fabricated veneers and occlusion, the idea was to simplify this method, yet still produce a precise result without making compromises on material properties and to focus on a high-quality and minimally invasive treatment option for patients who are becoming more critical about aesthetic dental treatments.

With pre-fabricated veneers and occlusions, most treatments can be done in one dental appointment saving time.
