Implants – Terminal Dentition

As our patients are aging, failure of their existing teeth and prostheses are requiring the need for more demanding and complex dental treatment. We are observing in a greater number of our patients they reach a time (terminal dentition) when the eventuality of entire tooth loss is unavoidable.

In this combined lecture from both the prosthodontic and Oral surgical aspects, we hope to share with you our experiences in managing these patients so that you may be able to use these philosophies in your daily practice.

Date: Thursday, 30th November 2017

Time: 6.30pm – 9.00pm

Venue: Arthur Lim Auditorium @ Alumni Association

Credit: 3 CPE Points

(Registration & Dinner served at 6.00pm)

Featured Speakers

Dr Winston Tan

Dr Kelvin Khng

Medical, Surgical, Dental Mission to Okpho (Myanmar)

Dates : 22 – 27 January 2018

Venue: Okpho Sitagu Hospital

Okpho is a remote area, about 5 hours by road north-west of Yangon. The people there are severely short of medical and dental care. The request, this time, is particularly for cleft surgery and women/child health. The hospital we are invited to use is just a building with no medical personnel.

Thus, we are seeking for volunteer cleft surgeons, anesthetists, paediatricians, gynecologists, dentists, and nurses.

Cost of the trip (airfare & accommodation) : \$700

If you'd like to volunteer please contact Dr. Myra Elliott at elliott@singnet.com.sg . mobile 98350794
