Implantology Fundamentals and Complications

Dental implants are now a vital part of restorative treatment planning for partial and edentulous patients. The need for dental implants is expected to increase in everyday dental practice. [This two-part symposium](#) focuses on the fundamentals and complications of implant dentistry. Part one is designed for new users as it reviews the basics of implant dentistry with special emphasis on

treatment planning. Part two focuses on the surgical, aesthetic, biomechanical, and biological complications associated with implant dentistry, including its prevention and management.
