## **Ethics Nite 2018 : Protecting Your Professional Reputation – Minimizing the Risk of Professional Challenge**

In an increasingly demanding professional environment, how can we help to reduce the risk of complaints, claims and Dental Council investigation, and help build our own reputation and that of the practice?

In describing real dento-legal case examples, delegates will be able to identify common themes arising and learn behaviours and actions which will help build and protect a professional reputation, particularly how to minimise the escalation of a case when things do not go to plan despite best intentions. We are all human, and mistakes will happen – how can we influence how the patient will react?

Dr Foster will use Dental Protections vast cases experience to bring this presentation to life and to help colleagues help themselves.

**Speaker** : Dr James Foster, Senior Dento-Legal Advisor

**Date** : Tuesday, 21st August 2018

**Time** : 5.30pm – 6.30pm: Registration & Refreshment

6.30pm – 9.00pm: Lecture followed by Q&A

**Venue** : Auditorium @ The Academia, Level 1, 20 College Road, S(169856)

**CPE** : 3 CPE points (Non-Core)

**Registration** : Pre-registration is required as seats are limited.

## **Rationale for the use of composite resins in direct posterior restorations**

**DentalTech Asia Pte Ltd** is delighted to share with our valued customers that we have been appointed as the exclusive distributor of **VOCO GmbH** (Germany) restorative material products in Singapore. VOCO has already introduced to the dental market a whole host of product innovations which have set new standards in quality. Often, they are far more than mere consumables – they have, in fact, become problem solvers. The new agreement further extends the company's range of solutions for the restorative and aesthetic

dentistry daily routine.

Composites have evolved over the years to a truly universal restorative material. **VOCO GmbH** together with **DentalTech Academy** are honoured to invite **Prof. Alejandro Bertoldi Hepburn** to present a lecture on the **“Rationale for the use of composite resins in direct posterior restorations”** on 11th July 2018, 2pm to 6.30pm at the Shangri La Hotel, Azlier Room. This is followed by a wine and dine evening event. The lecture fee is S\$80.00 with 4 CDE points. VOCO will be launching its new Admira Fusion.

Please see attached for the invitation and Admira Fusion launch offer!

## **Sleep Medicine : Dentistry & The Management of Sleep Disordered Breathing**

Dental sleep medicine. Do these words ring a bell? If not, then it's time you might want to update yourself with a new dimension of practice.

Sleep disordered breathing such as snoring, upper airway resistance syndrome (UARS), bruxism and Obstructive sleep apnea (OSA) are common in our patients. Most dentists are not trained to recognize such disorders, let alone providing a solution for the patients suffering from such conditions.

Dental sleep medicine (DSM) is a special branch of dentistry which focuses on the craniofacial and physiological connection with sleep disordered breathing. As a front line screener for potential OSA patients, dentists could work with physicians as a team to provide viable and economical solution for sleep disordered breathing.

Dr Aditi is a highly qualified trainer in DSM. She conducts courses for DSM internationally. Dentists and physicians are taught to identify the signs and symptoms of sleep disordered breathing and treatment options. There will also be hands-on sessions on how to make oral appliances to deal with the disorder.

This is probably the first dental sleep medicine course in Malaysia, mark your date and join us now to get early bird discount!

## **Myobrace : Straight Teeth The Natural Way**

The purpose of this course is to educate dentist on how to establish straight teeth the natural way for children, teens and adults in their own practices.

MRC courses demonstrate how to first become involved in this program then how to integrate MRC's appliances and comprehensive educational materials into your practice and profitably provide myofunctional orthodontic treatment for all children from ages 3-15. This involves wearing a removable Myobrace appliance for just a few hours a day and while sleeping.

Addition, dentists will learn how to deliver this programme to children in their practice with live training sessions.
