Accredited for
6 CPE Points

Programme

Time	Lecture Details	Speaker
0800	Registration	
0825	Opening Address	Dr. Terence Jee
0830	Predictable Apical Microsurgery I	Dr. John J. Stropko
1000	Tea Break / Trade Exhibition	
1030	Predictable Apical Microsurgery II	Dr. John J. Stropko
1200	Lunch / Trade Exhibition	
1330	Predictable Apical Microsurgery III	Dr. John J. Stropko
1500	Tea Break / Trade Exhibition	
1530	Predictable Apical Microsurgery IV	Dr. John J. Stropko
1700	End of programme	

Dr. Stropko received his DDS from Indiana University in 1964. After serving in the United States Air Force as a captain in the Dental Corps, he practiced general and restorative dentistry until 1987, then decided to further his education and pursue specialty training in endodontics. In 1989, he received a Certificate for Endodontics, from Dr. Herbert Schilder, at Boston University, and returned to private practice, as an endodontist, for the next 23 years.

Dr. Stropko enjoys lecturing and is an internationally recognized authority on Conventional and Surgical Micro-Endodontics. He has been a visiting clinical instructor at PERF; an Adjunct Assistant Professor at Boston University; an Assistant Professor of Graduate Clinical Endodontics at Loma Linda University; and was on the endodontic faculty at the Scottsdale Center of Dentistry, responsible for the Micro-Surgical curriculum. His clinical research on “in-vivo root canal morphology” has been published in the Journal of Endodontics; and, wrote the Micro-Surgery chapter, in Vol. III of Arnaldo Castellucci’s textbook, “Endodontics”. Dr. Stropko is the inventor of the Stropko Irrigator and was the co-founder of Clinical Endodontic Seminars. Over the past two decades, he has performed numerous national and international live MicroEndodontic and MicroSurgical demonstrations.

In 2012, Dr. Stropko decided to quit private practice and spend more time writing, lecturing, and traveling. His favorite pastime is keeping up with the ever-changing evolution of technology in endodontics and sharing his fifty years of dental practice experience. He is currently the Program Director for the Horizon Dental Institute in Scottsdale, Arizona. John and his wife, Barbara, currently reside in Prescott, AZ.

The 10 Steps for Predictable Apical Microsurgery

When performed atraumatically, the 10 Steps for Predictable Apical Microsurgery will eliminate stress for the operator, and decrease unfavorable results for the patient. Suture removal in 24-48 hours, with no significant post-operative pain, or swelling, is to be expected.

Course Outline:

1. Prepare the Staff, Instruments, Equipment
2. Position the Patient, Doctor, and Assistants
3. Anesthesia and Hemostasis Staging
4. Make a Complete Thickness Incision
5. Atraumatic Flap Elevation
6. Atraumatic Tissue Retraction
7. Access, RER, and Crypt Management
8. Root-end Procedures: REB and REP
9. REF Techniques and Materials
10. Sutures, Healing, and Post-op Care

At the conclusion of this presentation, the participants should be able to...

- Have increased confidence for getting the desired and positive results
- Eliminate unnecessary stress from the surgical approach.
- Create an ergonomic environment for the entire team.
- Recognize why the SOM is mandatory to achieve that next level of excellence and predictability.
- Appreciate the reason why routine use of CBCT is necessary.
- Understand how important the “atraumatic” approach is for success.
- Come to a decision for the correct “root-end” procedure to use.
- Determine which root-end filling material is best.
- Choose the best instrumentation for success.
- Consider LLLT Biostimulation to enhance the healing process.
- Create a positive office environment for a predictable result.

Participant's Details

Please complete this form in BLOCK letters. A separate registration form must be used for each participant.

Full Name

DCR

(For Singapore Dentists Only)
